

Speed Networking Event

On April 1, 2010 RochesterWorks! held a Speed Networking Event. The purpose of this event was to give individuals the opportunity to practice their 45 second commercial and try out their ability to network with others. This exciting event was held at the Rochester Museum and Science Center and 149 individuals participated. Those in attendance had ample opportunities to network with a variety of job seekers, RochesterWorks! staff and business owners. Attendees reported that valuable information was exchanged and overall, this was a very positive event. Additional feedback included; "I had the opportunity to practice my communication skills." "I got to meet and talk to many new people that I would have never met." "This event increased my intensity and my networking speed." "I learned a lot about other people." "Practice, practice, practice."

RochesterWorks! may look to repeat a networking event in the future. Visit the Career Center and www.rochesterworks.org to stay abreast to details as they become available about all upcoming events.
