

Assembler

AJL Manufacturing is a Rochester, NY based contract manufacturer with expertise in manufacturing low to mid-volume, high complexity products involving precision sheet metal frames, weldments, enclosure fabrication and electromechanical assemblies. We are looking for **A-Shift Assembler's** to join our team.

Essential Responsibilities:

- Ability to assemble various subcomponents into larger subassemblies, and or final assemblies.
- Ability to test final assemblies with electronic instruments.
- Ability to produce quality parts or assemblies within AJL Manufacturing processes, and standards.
- Participate in continuous improvement within the work group and possibly with cross-functional teams.
- Support more than one product line, demonstrating flexibility of assignment.
- Responsible for checking parts for missing hardware, prior to start of the job.

Required Skills:

- Basic blue print reading skills.
- Good manual dexterity, attention to detail and problem solving skills required.
- Ability to perform in a fast paced environment, meeting demanding schedules.

The ideal candidates must be highly motivated, dependable and eager to learn.

Experience

Previous Assembly experience preferred, but will train the right candidate.

Physical Demands

- Will sit or stand for long periods of time
- Ability to lift up to 40 lbs.
