FLSA Type: Non-Exempt

Responsibilities include:

- Use of mechanics, pneumatics, electrical control systems, and in-process computerized information systems.
- Independently identify, diagnose, correct, and document process trends and problems. Enlist support from manufacturing team and technical staff as needed.
- Utilize complex and detailed troubleshooting procedures to determine the best course of action for maximizing reliability of complex automation.
- Responsible for proper communication of troubleshooting activities.
- Perform corrective and preventative maintenance of equipment in cooperation with Plant Maintenance and other shifts.
- Accurately record data and observations during protocols and production.
- Assure compliance with established quality standards, test schedules, maintenance schedules, and production schedules.
- Provide direct input to daily production reports (shift logs) to include shift performance, shift accomplishments, and ongoing issues.
- Maintain awareness of process events that occur outside of your work hours via production reports and shift logs.
- Coordinate daily activity of supporting crew members such as utility and material handling personnel.
- Function as SME in advanced production line technology.
- Instruct associates in setup, inspection, and maintenance operations.
- Interface directly with support personnel regarding operational and technical issues.
- Provide written input to the continuous improvement of procedures for troubleshooting and operation.
- Read and understand mechanical drawings, electrical prints, and technical documentation.
- Support, encourage, and participate in team related activities (production meetings, in-service training, shift crossover, etc.).

Qualifications: Associates degree in related electrical or mechanical field or technical certifications preferred. Must have demonstrated knowledge of computers and software, strong trouble shooting skills, good verbal/written skills. A minimum of 2 or more years related experience; or equivalent combination of education and experience. PLC troubleshooting skills, mold machine experience – electric and hydraulic preferred.

Evening shifts available – 6:00 pm – 6:00 am
